

## Presentation Script — Vyatihar

Good morning everyone.

It is our pleasure to present Vyatihar — Where Ideas Meet.

Vyatihar is an open learning and collaboration platform designed to connect learners and mentors across languages and skills. It supports project incubation, skill exchange, and gamified rewards to encourage collaboration and continuous learning.

Demo flow (we will show):

- 1) Home – brief overview and platform highlights.
- 2) Login – secure sign-in using email or phone and password.
- 3) Profile – fill basic details: name, age, qualification, language, city, state, and whether you want to learn or teach.  
After saving, the site will show a success message and redirect to the dashboard.
- 4) Dashboard – choose subjects such as English, Math, Science, and Drawing. Start lessons, see progress, and view projects.
- 5) AI Matchmaking – enter preferred language and role to find compatible mentors or peers. Connect to start a session.
- 6) Projects – create and join collaborative projects with peers and mentors.
- 7) Earn – complete tasks to earn coins, redeem badges and rewards.

Closing:

Vyatihar focuses on equality, community, and practical collaboration. Thank you for watching — we welcome your questions and feedback.
